

BLOOMTIME®

YOUR IMPACT

Radical sustainability

As nature junkies, our mission is to satisfy the urge for nature where we live and work. This mission builds upon 25+ years of peer-reviewed research on *biophilia* that demonstrates the physical, psychological, and social-cohesion benefits resulting from access to nature. In addition, we believe that environmental sustainability is critical to the future of our planet. We therefore design our Planter Gardens to:

- **Manage rainwater** - Using green roof media and the natural power of transpiration
- **Sequester carbon** - Using perennial plants that keep carbon in-place by avoiding the highly-unsustainable, "seasonal swap-out"
- **Nourish native pollinators and birds** - Using native and adapted plant species
- **Provide healthy food** - When our Veggie Patch plant palette is selected
- **Keep materials out of the landfill** - Using long-lasting planters, media, and plants
- **Use recycled content** - For our lightweight drainage material
- **Support local businesses** - By sourcing plants from local plant nurseries

1% for Natural Lands

Restoring and preserving habitat in our region is just as important as cultivating nature where we live and work. That's why we've committed 1% of your purchase to Natural Lands, a regional, non-profit conservation organization that saves open space, cares for nature, and connects people to the outdoors. You can learn more about your impact by visiting natlands.org.
